

Interpret A Data Visualization

Insight 1:

Insight Explanation:

Statistical Analysis and Data mining is the top skill with most presence and Data Presentation is the top skill with least presence globally.

In the dashboard, I clicked on the Ranks for Statistical Analysis and Data Mining skill and then clicked on the ranks of each country. I also clicked on the rank for Data Presentations to show which all countries listed it.

Insight2:

Insight Explanation:

Cloud and Distributed computing is ranked #1 in most countries except for China which is also the Average Global Rank for that skill.

From the dashboard I selected the Cloud and distributed computing skill and selected the rank in all the countries where global rank matches the country rank.

Insight3:

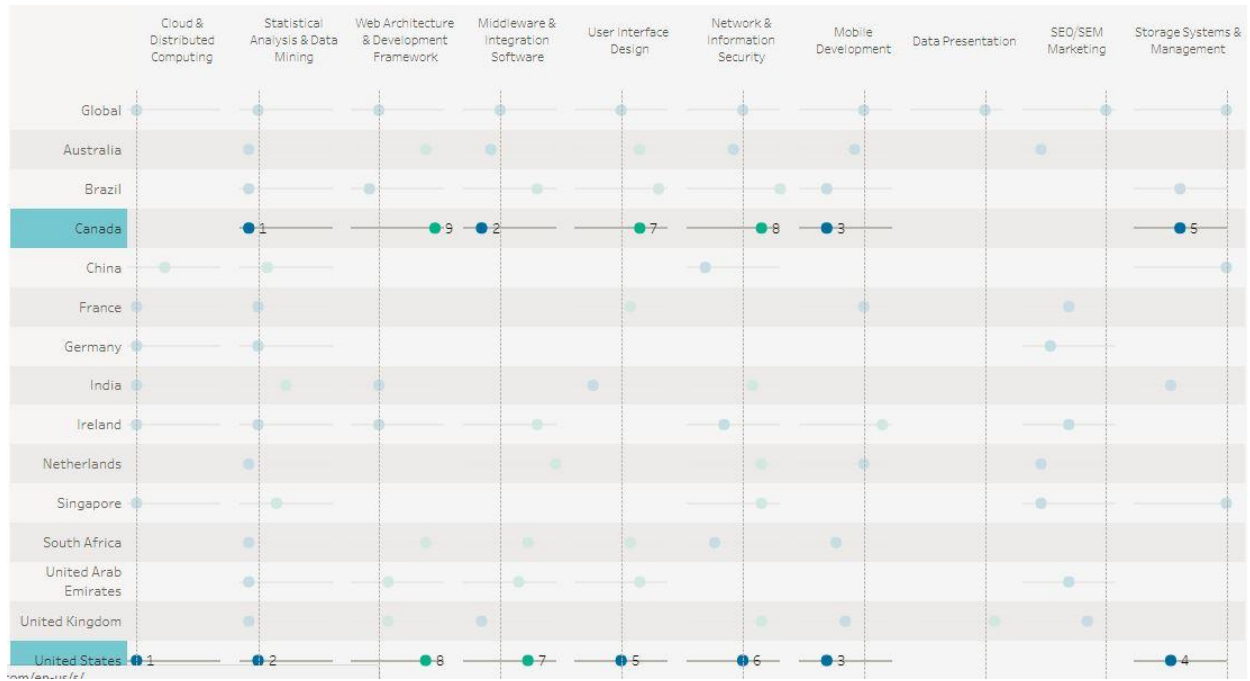

Insight Explanation:

Mobile Development and Data Presentation are the skills that are not ranked as top skills in the Asian countries.

In the dashboard I selected Singapore, UAE, China and India (all Asian countries) which highlighted the ranks of different skills in those countries and I can see that the two skills which are not in ranked amongst the top skills in the Asian countries are Mobile Development and Data Presentation.

Insight4:

Insight Explanation:

Data Presentation and SEO/SEM Marketing are the skills that are not ranked amongst the top skills in the North American continent.

From the dashboard I selected USA and Canada, the countries in North America which highlighted all the skills ranks except for Data Presentation and SEO/SEM Marketing in both USA and Canada.
